AROUND THE WHIST TABLE.

COMING MERTING OF THE AMERICAN
WHIST LEAGUE IN CHICAGO.

Enterest in the A. W. L. Challenge Cup
Greater Than in the Hamilton Trophy—
The Proposed Abolition of the Turned
Trump—Art of Reading Hands at Whist.
Three weeks from to-day the clans will be gathering at the Auditorium in Chicago to battle for the various championships of the American Whist League. There is not the concentrated interest in these contests that there was some years ago, chiefly because there are now no great rivairies. The painty days of athletics were when the "winged foot" and the "cherry diamond" were pitter enemies, and every meeting was a battle royal. The painty days of whist championships were when Baltimore, Philadelphia and New York met in the flerce struggle for the supremacy at Manhattan Beach in 1803. A nowscaper war had preceded the actual battle and the discussion of the merits of conflicting systems was carried on with all the rancor of religious fanaticism. The Hamilton team carried off the honors of that struggle, and then retired from the field forever. The difference which were then so marked have been smoothed overtench side has come to see some gool points in the theories of its adversaries, and personal prejudice has been overcome ty practical ex
strongest players. Many persons believe in opening all thands with a trump because it is manifestly impossible to ruff anything if there are at least three cards of sech plain suit in the head that man least in the head to the best possible openings in his spade sequence, a read least five earls there cards of whether he best desirable from which to lead since the carliest days of whist.

Trick 2 With his evident advantage of both the sings the discingtive from which to lead since the carliest days of whist.

Trick 2 With his evident advantage of both the sings the most desirable from which to lead since the carliest days of whist.

Trick 2 With his evident advantage of both the sings the lead that provide the she would be earliest days of whist.

T prejudice has been overcome by practical exlonger any great rival theories in the field, for every team of any note has come to recognize the great truth that it is not so much the system as it is the ability of the players to use it

which wins the games. While the Hamilton trophy still stands as the emblem of the championship, there are the place it occupies as the chief prize of the league and that the A. W. L. challenge cup should take its place as the principal trophy Whether or not there will be any move made at the forthcoming congress to bring about this change is matter of conjecture, but it has several times been suggested. As it now stands, the Hamilton trophy is not of much use to any one, even as an ornament, because

at the forthcoming congress to bring about this changes in auties of some surgesters. As it now several times been suggested. As it now use to any one, even as an ordane it, because it is looked up in a safe-de-roal vault all the time and not one whist claver in fifty entire and the time and not one whist claver in fifty entire the same the has also been so much of the elam there has also been so much of the elam the which the preliminary games have been played, that very few clubs have been entirely autiend with it. The Philadelphia Current at the Part in Bay congress in 1847 being unquestionable, as it actually played every challenger and never lost a same upon the control of the elam to the challenge trouby and the strongest class in the stro

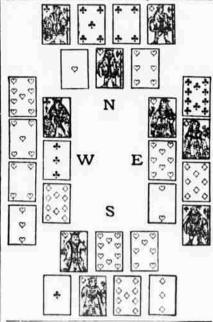

peading certain carlis which had previously been agreed upon as calls through honors.

Every now and then some one writes to The Bun asking what is considered the most important thing for the student to devote his attention to in perfecting himself as a whist player. While it is impossible to answer such a question by selecting one thing as decidedly better worth attention than anything else, it is certainly not difficult to plet out some things as of such importance that they may be considered indispensable. Of these The Sun would be inclined to place residing the hands as the most important of all, because, no instead of the inclined to place residing the hands as the most important of all, because, no instead only one thing, to enable the various to read each other's hands with sufficient clearness to permit them to grasp the possibilities of situations. Whether this system conveys information of a general nature only, as in the compron-sense game, or goes into the details of spots, as in American leads, the object is the same-to guide or coax the partner to follow a certain course, if he holds cards to justify it. Very few players read hands exertain; and if the mental processes of some of those whom we rank among our best players could be revealed it would be found that their ideas of the positions of certain cards at certain stages of the hand were very have indeed. The remarkable record of J. B. Elwell in the various clubs in which he plays is uniquotiedly due more to his ability to read hands than anything else. Thereare quite a number of persons who do not agree with his theories of the game and do not approve his system, but the fact remains that he can play just as well and make just as good secres without any system whatever as he can when playing with partners whose ideas agree with his two the fact remains that he can play just as well and make just as good secres without any conventions, not even a trump signal, simply from his ability to read hands, As an illustration of his style, take the foll READING HANDS.

B. J. Miller, New York.—The conditions to govern our second correspondence tournament were printed in Tue Sers some time ago. The entrance fee is \$1, every contestant plays against three other competi-tors in the same section and so on. As soon as the regulard number of twenty contestants has been reached the conditions with be reprinted, together with the pairings and other details to govern the competition. OUR FIRST CORRESPONDENCE TOURNAMENT. A controversy has arisen in the games between Klingsper and Widmer in section 4. Widmer, says Klingspor, had forwarded a certain move, which the tormer thought he did not send. Under the cir-ciumstances Widmer is hereby requested to forward to The Sun a statement in order to adjudicate this

matter.
P. F. Monzert, Brooklyn, writes to THE SUN stating that Sam A. Salvage, St. George, Staten Island, has resigned his games in section 5 of the tournament.

A. F. Davis demands his games against Schroeder in section 1 on the time-limit rule. A fortnight's grace will be given for Schroeder to state his side of the case.

the case.

OUR SECOND CORRESPONDENCE TOURNAMENT.

THE SUN received additional entrance fees from Barnet Yelman, Brooklyn, W. H. Phillán, Archibald, Pa., C. F. Darling, Newbury, Vt. A. F. Kleymborg, New York, and Mephen J. Lyon, Collins Ille. Conn. This makes eighteen entries in all. However, O. N. Burke. Brooklyn, would also be willing to enter, provided another entry is received during this week. Should no more entries come to hand, The Sux will start the contest with nineteen competitors next Sunday.

Small Boats of the Lark Class Popular. When T. Fleming Day, the well-known rachtsman, had the original Lark constructed he had no idea that he was establishing a class of small boats that would become popular all over the world. Day wanted a small shoal draught boat that could be easily handled and built for about \$50. The work of solving this problem was given to Charles G. Davis and the result was the Lark. The dimensions of this boat are 16 feet long. 6 feet beam and 6 inches draught, exclusive of the rudder and centreboard. With the latter down the draught is four feet. The sides are drawn in at the ends so that the beam forward and aft is only five feet. The how is shaped like the bow of a ferryboat. The sail contains 200 square feet

ferryboat. The sail contains 200 square feet of canvas. The centreboard trunk and mast step are formed by boiling two planks together, which run through the centre of the boat and stiffen the whole structure.

In this country and Canada more than 100 of these boats have been built. The Buffalo Yacht Club has twenty-one, the Bpringfield (Muss.) Canoe Club six, and the Mattabesett Yacht Club of Middletown, Conn., six. There are also some in France, England, Ireland, Scotland, Austria, Finland, Germany, Mexico, Buenos Ayres, Penang, Honolulu, New Zealand and Tasmania, and there are two large fleets, one at Sydney, New South Wales, and another in Western Australia. The most expensive boat of this class was built at Honolulu and cost \$150. The cheapest was constructed in Canada for \$20, all complete. In England they cost \$100, and around here they can be built for \$50.

The Douglaston Yacht Club has arranged a week's racing for these boats, to begin on Aug. 20. Day has offered a sliver cup for the champion, and prizes have been offered for other races.

Atlantic Yacht Club Cruise.

Commodore Frederick T. Adams, through Fleet Captain Thomas L. Watson, has issued orders about the cruise of the Atlantic Yacht Club. The fleet will rendezvous in Larchmont Harbor on July 3. The Larchmont Club, through the Board of Trustees, extended the courtestes of the organization to the Atlantic Club on the cruise. On July 4, after witness-ing the races in the annual regatta of the Larchmont Club, there will be a meeting of Captains on board the flagship Sachem. This neeting has been called for the purpose of considering the details of the cruise. The plans as at present arranged are:

plans as at present arranged are:

On July 5, on signal from the flagship, the fleet will get under way for the start of the run from Larchmont to Black Rock.

On July 6, on signal from the flagship, the fleet will get under way for the start of the run from Hack Rock to New London or Morris Cove, as may be determined on the morning of the run.

On July 7, on signal from the flagship, the fleet will get under way for the start of the run from New London to Greenport if at New London, or from Morris Cove to New London if at Morris Cove.

All of the above runs will be sailed under the supervision of the Hegatia Committee.

The Bridgeport Nacht Club has extended the courtesies of the club to the Atlante Yacht Club, and also invited the flag officers Captains and greets to attend an informal reception at the clubhouse on the night of their arrival.

The residence of the Fleet Captain at Black Rock will also be open to the visiting vachtamen and their friends.

Additional orders will be issued when determined. friends.
Additional orders will be issued when determined upon at a meeting of Captains to be held on arrival at Shelter Island.

Drisler and Cutler Schoolboys Discuss Plans

The final meeting for the year of the Drisler School A. was held on Friday afterno the small amount of athletic material on hand, the season was fairly successful. As all of the old officers will be back, they were re-elected. The Treasurer's report showed a balance of \$50 on hand after all debts had been paid. President Akin said that he thought next season would be a banner one, inasmuch as several new boys were coming to the school who have quite an experience in the athletic line. There was considerable talk about football. The school never supported a strong first team, but the second team has always played a strong and aggressive game. President Akin is in favor of and aggressive game. President Akin is in favor of engaging a coach for the eleven next year, as it is understood that there will be plenty of material on hand. Columbia Oval may be secured for practice grounds. One of the feature at the school will be lockey. The team finished second in the championship race last year, and practically the same players will constitute the team next year. The association intends to build a handball court and it may be placed in the gymnasium. The candidates for the football team were invited by President Akin to spend a few weeks of their vacation with him in Rockland county.

A business meeting of the Cutter School A A was him in Rockland county.

A business meeting of the Cutler School A. A. was held yesterday afternoon. George Salmon, last year's football coach and athletic trainer, was reelected. It was officially announced that C. Warren, the crack all-round athlete, will be at the school again next year. There seems to be no doubt that he will be elected captain of the football elevan, and will cooperate with Coach Salmon to make the team a atrong one. All the practice will be done at Columbia Oval.

Throughout our store clearance prices are the rule. We have still large stocks in our Factories and Reserve Stock Rooms, all of which must be sold during the present month, no matter at what loss to us. Convince yourself that we give you the best for less money than you pay I for inferior goods elsewhere.
